19. ABSTRACT (Continue on reverse if necessary and identify by block number)

This report presents the estimation of case total limits for catastrophic re-insurance payments to be made to thirty-seven Army Gateway catchment areas for Fiscal Year (FY) 1995. Case totals include both institutional and professional services CHAMPUS payments. FY 1994 data were used to derive the estimates. Catastrophic case cutoffs are listed in Table 1 as part of the report Summary. These cutoffs, when implemented by Army Medical Command (HQ MEDCOM), will result in approximately 5% of each catchment area's total annual CHAMPUS budget being paid through catastrophic re-insurance. Appendix A lists the actual computation for each site and displays cutoffs associated with various percentages of the budget paid as re-insurance. Appendix B displays each catchment area's Privacy Act protected catastrophic cases which satisfied the 5% cutoff criteria during FY 1994.

## Executive Summary

This report presents the estimation of case total limits for catastrophic re-insurance payments to be made to thirty-seven Army Gateway catchment areas for Fiscal Year (FY) 1995. The HQ Medical Command (HQ MEDCOM) program of catastrophic re-insurance began in FY 1992 for the initial thirteen Gateway sites only. The Tri-Service CHAMPUS Statistical Database (TCSD) Composite Institutional Record V2.0 database which includes both institutional and professional services CHAMPUS payments is used to derive case totals, utilizing FY 1994 data to obtain the estimates for this report. Catastrophic case cutoffs are listed in Table 1 as part of this report Summary. These cutoffs, when implemented by HQ MEDCOM, will result in approximately 5% of each catchment area's total annual CHAMPUS budget being paid through catastrophic re-insurance. Appendix A (pp. A-1-37) lists the actual computation for each site and displays cutoffs associated with various percentages of the budget paid as re-insurance. Appendix B (pp. B-1-52) displays each catchment area's Privacy Act protected catastrophic cases which satisfied the 5% cutoff criteria during FY 1994.

Appendix A (pp. A-1-37) lists the actual computation for each Gateway site and displays the cutoffs associated with various percentages of the budget paid as catastrophic re-insurance. For each catchment area, catastrophic cutoff amounts for hospitalization cases discharged in FY 1994 were compared to the actual grand total government payments processed for all CHAMPUS care provided in that catchment area during FY 1994. These overall CHAMPUS claims were extracted with claims paid through 31 December 1994 to obtain a more complete grand total based on FY 1994 date of care. From this comparison, case cutoffs were derived for each catchment area (pp. A-1-37). The appendix only shows each catchment area's cutoff percentages that are in the range near the 5% level. Table 1 in this Summary (p. 3) lists each catchment area's computed catastrophic case cutoff amount at 5%, the total CHAMPUS costs in FY 1994, and the resulting catastrophic payment total at that percent. For example, as shown in Table 1, once a case reaches \$62,000 at Fort Hood, HQ MEDCOM would assume liability for all payments above that cutoff amount. Based on the hospital discharges occurring in FY 1994, that cutoff would have resulted in \$1,536,203 paid to Fort Hood through catastrophic re-insurance, assuming all care was actually paid in FY 1994.

Due to base closures and the subsequent downsizing of MEDDACs to clinics, some catchment areas listed in this report will have unreasonable case limits because of data that are in transition. For instance, one such MEDDAC now closed is Fort Devens, whose FY 1994 data calculated to a \$1,000 cutoff amount for FY 1995. However, these transitional catchment areas have not been omitted from this report. Case limit amounts to be utilized during FY 1995 range from a low (aside from Fort Devens) of \$11,000 at Fort Drum MEDDAC to a high of \$232,500 at Fort Sill MEDDAC (p. 3, Table 1). At Fort Drum,

nineteen FY 1994 hospitalization cases (see pp. B-16-17), each with CHAMPUS costs over Drum's \$11,000 case cutoff limit, had cost excesses that summed to \$397,899, or 5% of Fort Drum's \$8.0M total annual FY 1994 CHAMPUS budget. On the other hand, Fort Sill MEDDAC, with its high cutoff of \$232,500, had three FY 1994 institutional patient cases (p. B-44) whose total excess costs after the \$232,500 cutoff amounted to \$522,420, or 5% of Sill's nearly \$10.4M total FY 1994 annual CHAMPUS costs. This variance in computed catastrophic cutoff amounts between catchment areas is dependent on several factors besides the amount of a site's total annual CHAMPUS budget and the percentage of budget used for the cutoff. As shown above, a primary part of the computation is the catchment area's actual CHAMPUS patient caseload whose costs are used in the mathematical methodology deriving the various cutoff amounts.

For each catchment area, Appendix B (pp. B-1-52) displays the Privacy Act protected catastrophic patient cases which satisfied the cutoff criteria during the FY 1994 year. It should be noted that the methodology used hospital discharges which occurred in FY 1994 when computing catastrophic case cutoff limits. Examination of Appendix B will demonstrate, for at least some of the longer hospital lengths of stay, that not all of the hospitalization may have been paid, or even occurred during FY 1994. For purposes of cutoff computation, the total cost of each case was arbitrarily assumed to have been paid in the same fiscal year as the discharge, i.e., FY 1994. This assumption was employed to use a prevalence-based estimate to project catastrophic cases which would be expected to arise throughout a given budget year. In any year there will be hospitalizations which surpass the catastrophic limit which were admitted during the previous year, or discharged and partially paid during the following year, as well as hospitalizations which are admitted, discharged and paid for within the same year. As reported in the Executive Summaries of the Health Services Command Publications Fiscal Year 1993 CHAMPUS Catastrophic Case Limits, Gateway Catchment Areas, RP 93-009, DTIC: AD A262 324, February 1993, and Fiscal Year 1994 CHAMPUS Catastrophic Case Limits, Gateway Catchment Areas, RP 94-011, DTIC: Not Yet Known, February 1994, it has been determined through testing with several Gateway catchment areas' data that the above methodology provides a very accurate estimate of future catastrophic re-insurance payments.

Technical Note. The following TCSDP data were utilized for report:

- A) Composite Institutional Record (CIR) V2.0
- B) Composite Professional Record (CPR) V1.0
- C) Main Relational Libraries V1.1
- D) TCSDP Indexing Logic Module #C5B1A95.
